Experiment No: 9

Write a program in python to guess the number.

Procedure

1. Open any IDE for python(like sublime, pycharm, etc)
2. Import random library.
3. Take data form user using input().
4. Check the input data is same as random function generated or not.
5. If the number is same the break the loop otherwise follow the same procedure until you find the correct number.

Code

```
import random
r = random.randint(1,20)
print("guess a number")
while(True):
    inp=int(input())
    if(inp<r):
        print("wrong guess, try a greater number")
    elif(inp>r):
        print("wrong guess, try a smaller number")
    else:
        print("cngrts you gussed the right number!!")
        break;
```

Result
